The specifications in this catalogue are a brief list of the most important components. More specific details can be found on the web with the respective bike models.

## IMPRINT

A close-up, black and white photograph of a bicycle frame. The frame is a light color, possibly silver or white, and has a sleek, aerodynamic design. In the upper right, a black component, likely a headlight or fender, is visible. The main focus is a logo and text on the frame. The logo consists of a stylized 'M' shape with a crown-like top and three stars. Below the logo, the text reads "DESIGNED AND ENGINEERED IN HAMBURG".

DESIGNED AND  
ENGINEERED IN  
HAMBURG

# STEVENS HAMBURG

## COSMOPOLITAN AND DOWN TO EARTH

As part of the Hanseatic League, we are: down to earth and cosmopolitan, reliable and daring, understated in demeanor and deeply convinced of liberty in both mind and deed. Hamburg inspires. To question yourself and aspire to improve in every detail is a daily routine here. These are the best conditions to build sporty bikes. This is what we at STEVENS have been living by, every day now for almost three decades.

### COOL HEADED CONSTRUCTION

Designing a bike from the first concept to a rideable prototype demands a clearly structured work process. Many people bring in their experiences and doubts, their know-how and their wishes. Countless ideas come together for every new bike project. They must be approved, discarded or improved step by step, and in the end they have to be rigorously tested. All of this happens in Hamburg – the label ‘Designed and engineered in Hamburg’ is applied to each and every single one of our bikes for a reason. We do this with state-of-the-art software, in our own laboratory, and with our own latest technology machinery.

### STRAIGHT FORWARD TALK

Everyone who has any responsibility at STEVENS lives and works in Hamburg. Here, we come together every day. Here, everything is on the table. Suggestions of professionals who push our bikes to the limit, on and off road. Opinions of dealers, who add their very own knowledge and their customers’ experiences. Reports of the in-house quality management and those we read in the press about our products.

### LOCAL PRODUCTION

Most STEVENS bikes are made in the European Union, and most of them by STEVENS Produktions GmbH, a subsidiary of STEVENS in Northern Germany. The designers’ studios are only a few steps away from our workshop for custom road bikes. This means these high-end bikes are created right before our eyes. The process – from first draft to actual finished bike – is always visible, perceptible, and comprehensible. Always exciting. When the two-wheeled creations come to fruition, it can be best described in one word: FUN!

# HAND IN HAND

## LOCATION GERMANY

We stand behind our first-class suppliers from all over the world. Yet we want most of the creation of value of STEVENS bikes to take place in Germany. With this said, 60% of our bikes are assembled in Germany, with about 85% within the EU – always under the keen eyes of our quality assurance engineers. We also build STEVENS wheels ourselves. In addition, we have developed a comprehensive Custom Bike Program that has earned us the title of market leader for personalized road bikes in Germany – naturally ‘Made in Hamburg’.

### SHORT SUPPLY CHAINS

Once you've gained the trust of Hanseatics, you become a part of their extended family. We very much appreciate long-term, trustworthy partnerships. Among our oldest and best partners are a few based in Germany. Our e-bikes are illuminated by Busch+Müller. They create innovative lighting systems out of Meinerzhagen in the Sauerland region. From the same area comes SKS, the manufacturer of high-quality mudguards and from Pinion, we get innovative 12- and 18-speed gear boxes that represent a true milestone on the quest for an even longer lasting bicycle.

### CUSTOMER PROXIMITY

All year round, you can spot our STEVENS employees cruising down German roads, trails and bicycle paths. So naturally we are very much in touch with the requirements and demands of the highly discerning German bicycle market. Through our hands-on experience, we've come to rely on a network of 600 specialist retailers that are solidly ahead of their competition in terms of competence and service. We also maintain relations with countless loyal customers – and have received their extensive feedback even before the advent of Facebook, Instagram, etc. Through these relationships, our approval rating is quite high in brand preferences when it comes to national magazine reader surveys.

# TECHNOLOGY

## SMART SOLUTIONS

Why do STEVENS' all-round bikes set the gold standard in every price category in terms of light weight and responsive handling? Why do happy customers, loyal dealers, and trade press repeatedly express their appraisal in numerous test wins? Because our engineers do everything they can to find the best and literally most reasonably priced solutions for all the requirements a bike has to fulfil. This includes requirements for everyday use to extreme situations – be it riding to work, fast-paced fitness training or bike-touring to the North Cape. You don't need to know what "Aluminium Superlite 6061 Triple Butted" means or how an 18-speed internal gear box works. But you can experience it while riding.

1

### ELEGANT SOLUTION

The attachment of the pannier rack is invisibly integrated into the fender. STEVENS' designers wanted it and our partners at Racktime and SKS Germany made it happen. Tip: When you remove the spacer under the cross strut, you can fit comfortable 47mm tires.

2

### FOUR IN ONE

This dropout embodies a lot of development work. It smartly combines four important functions. Rear wheel alignment. Highly precise braking. Almost invisible yet very stable eyelets for a kickstand. And an elegant transition into the pannier rack struts, designed in collaboration with our supplier Racktime. We take some pride in claiming that no other competitor pays so much attention to detail. But of course you knew that already.

3

### SELECTIVE STIFFNESS

Whenever you see features like "tapered headtube" and "tapered steerer" you can gladly look forward to experiencing maximum steering precision with minimum weight. The upper headset bearing measures 1.125", and the lower a sturdier 1.5" in diameter. Frame and fork shaft are stiffest where the highest loads occur.

4

### MASTERPIECE

Our engineers take pride in this splendid specimen made from aluminium and rightfully so: The exclusive S-Lite Aluminium fork seamlessly extends the elegant lines of the top-of-the-line STEVENS frames in this catalogue. Its fork legs are made from one single piece. Only the fork shaft, dropouts and brake mounts require welds. At the top, the tapered fork shaft easily absorbs brake and steering forces. At the bottom, a thru-axle tightly clamps the front wheel even when it's attacked by an aggressive disc brake.

3

4

# TECHNOLOGY

## CAPABLE PARTNERS

When it comes to your safety and unrestricted suitability for everyday use, we trust only the best suppliers – from the lightweight aluminium fork to the supplemental reflectors. All our fully-equipped bikes use hub dynamos. In an increasing number of models we are now incorporating hydraulic disc brakes to guarantee the best possible braking in any weather. From the very beginning, we rely on perfectly synchronized Shimano components, long-lasting and low-maintenance gear hubs, or innovative highlights such as the 18-speed gear box from Pinion with carbon fiber-reinforced drive belt. If the STEVENS engineers and test riders give their approval on a product, then you can rely on it 100%.

1

### THE MORE THE BETTER

With 636% gear range, the 18-speed gear-box from Pinion outperforms even the most off-road capable MTB derailleurs by far. What does that mean for you? This made-in-Germany gearbox delivers the perfect gear for every situation – from insanely steep climbs like in the Ardennes or other European mid-range mountains to the tailwind-driven final stage of a tour to Lago Maggiore.

2

### FORM AND FUNCTION

There simply is no more successful combination of pannier rack and safety lighting system. We, and our demanding customers, can give thanks to Racktime and Busch+Müller for this. Note: The big red thing at the back of the bike is not the rear light, but rather a reflector that we are obligated to mount on our bikes.

3

### KEEP ON RUNNING

At the request of many STEVENS dealers and even more everyday and long-distance cyclists who never want to touch a bottle of chain oil again, we are equipping more and more of our models with hub gears or central gearbox with Gates carbon belt drive. It remains almost wear-free. Every few weeks, a bit of warm water and a brush are enough to care for it.

4

### DOWN TO THE SMALLEST DETAIL

You will always recognize a STEVENS by its small sophisticated details in places where others are satisfied with standard solutions. Here, our partner Pinion has incorporated a clever update: Both cables now exit the shifter in the direction of the stem for ensuring a clean cockpit layout on the Trekking Premium models C18 and C12 Lite. Special cable guides are no longer necessary.

SUPREME PRO

SUPREME

---

Light, sporty, fast – these qualities are beautifully embodied in the STEVENS City Cross. Pleasantly understated aluminium frames are combined with top-shelf components to ensure for a comfortably low overall weight. The perfect ride for both fast daily commuting through the city as well as relaxed tours through the countryside.

Are you into speeding to work, or maybe long, fast-paced tours? Well, these situations are where the STEVENS Supreme shines. They combine the speed and agility of STEVENS cyclocross models with key accessories like mudguards and lights for ultimate daily riding pleasure.

---

# CITY CROSS

## 6X LITE TOUR

### FEATURES //

#### 1. FULLY EQUIPPED

Even with a total weight of less than 13.5 kg a cyclotourist does not have to relinquish anything. But he may appreciate elegant mudguards and sturdy anchored pannier racks.

#### 2. LIGHTWEIGHT LEADER

Our S-Lite Aluminium fork provides the stiffness and stability needed for high steering precision, strong disc brake forces and luggage on the optional lowrider front rack.

#### 3. RELIABLE COMPONENTS

3x10-speed drive train and disc brakes from Shimano's well-proven Deore trekking bike groupset.

#### 4. FAST WHEELS

Schwalbe's G-One Allround tires are super smooth-running.

---

## ALWAYS MORE PRECISE

---

Thanks to our decision to go with STEVENS' S-Lite aluminium fork instead of a suspension fork, all riders of our "Lite" models will be rewarded several times over. They will benefit on every incline due to the extra weight savings. The outstanding steering precision and torsional stiffness from the rigid fork will be strongly appreciated in every turn - even when the hydraulic disc brakes bite down on the 180mm rotors. They will also save on maintenance costs.

---

## SMOOTHER AND FASTER

---

Numerous tiny round rubber knobs help the G-One Allround tire to roll effortlessly over tarmac and hard-pack roads. Even on gravel, the rider of a 6X Lite Tour does not need to slow down. At only 380 grams, it's also astonishingly light.

# CITY CROSS

## SUPREME PRO

### FEATURES //

#### 1. IT GOES ON AND ON AND ON ...

... and does not scare away from any terrain or weather – 365 days a year either on your way to work or for fast-paced touring.

#### 2. IN ANY CASE

The front wheel houses a reliable hub dynamo. And hydraulic disc brakes always offer superb power and fine modulation.

#### 3. GRAVEL SPEED

Shimano's new GRX drive train and 40mm wide studded tires are perfect prerequisites for ...any kind of route that's fun to ride.

#### 4. SAFETY FIRST

The bright tail light is not only perfectly visible but also well-protected by being integrated into the mud guard. And a classy Supernova front beam lightens the road ahead quite perfectly.

---

## EVERY-DAY CHAMPION

---

Due to STEVENS' cyclocross genes, both frame and fork are well prepared for everything that can be thrown at them. A high-tech LED headlight from Supernova illuminates the path in front of you when you're on your way to work on a winter morning. The Schwalbe tires' tiny knobs combine easy rolling with sufficient traction.

---

## FOUR-SEASON SPORTSTER

---

Hydraulic Flatmount disc brakes. Stiff QR12 thru-axles. Standard mud guards and street-legal lights. Smartly integrated kickstand mount. We prepared the new Supreme Pro well for maximum versatility. Now it's up to you to convert these technical capabilities into a maximum of yearly mileage.

---

# URBAN

---

STRADA 1000  
STRADA 900

STRADA 800  
STRADA 600

---

Do you like to ride fast and in style all around the city? Then your bike's frame has to read "Strada" – the name for minimalistic machines spec'd with the newest road drivetrains, hydraulic disc brakes, arrow-fast road bike tires and flat handlebar.

---

# URBAN

## STRADA 800

### FEATURES //

#### 1. SVELTE SPEEDSTER

Thanks to its lightweight aluminium fork and well thought-out component mix, the Strada 800 only barely breaks the 10-kilo mark. And it looks fast in "Frozen Silver" even when stationary.

#### 2. POWER DRIVE

A Shimano 105 2x11-speed drive train with compact cranks – no wonder so many road cyclists will only see its rear wheel ...

#### 3. SPECIAL HANDLEBAR

Our Strada series combines road bike technology with flatbar functionality – the best of both road cycling and mountain bike worlds, so to speak.

#### 4. FAST ROLLER

Continental Contact Speed tires on a Fulcrum Racing wheelset will make you lust for more. More Speed to be exact.

---

## ROLE MODEL

---

This fork is the perfect match for our Strada 800 speedster. Sleek 1.125" diameter at the top and beefy 1.5" at the bottom for superb steering and absorption of braking forces. Brake housing is well-protected as it runs behind the left fork leg.

---

## POWERFUL BRAKES

---

When a bike is as fast as our Strada 800, only up-to-date technology, namely Flatmount disc brakes, qualify to provide the rider with 100% control and confidence. An extra portion of suitability for everyday use is now provided by the kickstand mount integrated into the dropout.

---

# STRADA 1000

- › Lightweight and fast city racer – updated w/ integrated kickstand mount
- › Full carbon fork w/ tapered steerer and thru-axle

4X

3X

---

With an X-Cross bike from STEVENS you can either smoothly cruise the asphalt jungle smoothly in style or increase your mileage on unpaved roads. X-Cross bikes combine the best of both trekking and mountain bike worlds: a light, elegant, yet stiff aluminium frame featuring a geometry that easily splits down the line between comfortable and race-oriented. Added to it is a comfortable suspension fork and a derailleur drivetrain with finely-stepped gears. There are also grippy, fast tires and hydraulic disc brakes. Maximum weight is 13.5 kg (30 lbs). STEVENS X-Crossers are straight-forward, sporty all-rounders that set the benchmark for versatility.

---

# X CROSS

7X

## FEATURES //

### 1. LIGHTWEIGHT AND STIFF

This is what aluminium in perfect shape looks like – tapered head tube and delicately welded.

### 2. BORN TO BE SPORTY

Nimble steering geometry meets sporty yet comfortable seating position.

### 3. FULL CONTROL

SR Suntour's oil/air suspension fork and Shimano's hydraulic disc brakes keep everything under control.

### 4. ALWAYS FORWARD

Shimano's 3x10-speed drive train with Deore XT Shadow rear derailleur always gives you the right gear for every kind of ride situation – be it on a steep uphill ramp or full-throttle ahead.

---

## TOWN AND COUNTRY

---

With its tightly packed center knobs, the Schwalbe Smart Sam tire effortlessly rolls over tarmac and fast gravel roads. As soon as the surface becomes loose, the knobs on the shoulder of the tires dig deep into the ground to allow for amazing high cornering speed. Tip: When you leave the paved road for the forest trails, a lower pressure in the 42mm wide tires is beneficial – 3.5bars (51psi) is usually enough.

---

## COMFORT AND CONTROL

---

The 7X's moderate handlebar rise makes for a convenient seating position – even as your trips become increase in length. The three-finger brake levers plus hydraulic disc brakes provide superb stopping power and fine modulation at any time.

# TREKKING PREMIUM

P18  
C12 LITE  
AVANTGARDE

ESPRIT  
RANDONNEUR DISC

---

If you like bike touring and appreciate high-quality components, you will love STEVENS Premium Trekking models. Sensationally lightweight bikes with modern technology, hydraulic disc brakes and high-end lights. Stiff, compact frames with a low-key appearance. Top shelf parts, be it either a Rohloff gear hub, Shimano Deore XT derailleurs or Pinion gear box with 12 or 18 gears. In short: Everything you need for a superb ride every time you go on a local tour or explore new lands.

---

# TREKKING PREMIUM

C12 LITE

## FEATURES //

### 1. SOLID BASE

The classy aluminium frame and super-light fork are more than eye candy – their job is to ensure secure but agile handling and highest steering precision.

### 2. 12 IN A BOX

The finely graduated Pinion C1.12 gear box and Gates' carbon belt drive are the perfect drivetrain combination that excels from the very first pedal stroke on.

### 3. PERFECTLY BALANCED

On every tour the C12 Lite's rider benefits from its perfect balance between a sporty and comfortable seating position.

### 4. TYPICALLY STEVENS

Pannier rack and rear light cannot be integrated more elegantly into the overall concept.

---

## SMALL POWERHOUSE

---

In the small space where a frame usually only houses the bottom bracket, you'll find the C12 Lite's entire gearbox. It supplies the rider with 12 finely graduated gears. Despite its enormous 600% range, it's significantly lighter than its "big brother" P1.18 thanks to magnesium housing. When riding, you'll notice how its perfect weight distribution positively affects handling.

---

## SLIM AFFAIR

---

STEVENS premium trekking bikes repeatedly win accolades and that's first and foremost due to their well-tuned ride characteristics. This is made possible by the sleek head tube which is wider at the bottom ("tapered") to absorb steering forces. Attached to it are load-specific shaped frame tubes to guarantee utmost stiffness and light weight at the same time.

---

JAZZ LITE

ALBIS

---

STEVENS Trekking models are outstanding do-it-all bikes. Spec'd for everyday use with well-proven, long-lasting components throughout such as state-of-the-art LED lights, mud-guards and sturdy pannier racks. They offer everything to make life on two wheels easier, be it the daily commute, grocery shopping with panniers, a weekend trip or a multi-day tour with lots of baggage. Their relaxed seating position makes our trekking bikes the perfect companions. They feature high-quality, functional components in every price range. And they're never overweight despite their practicality, since they prioritize what's most important in cycling: having fun.

---

# TREKKING

## GALANT LITE

### FEATURES //

#### 1. STURDY STRUCTURE

The proven aluminium frame as the optimum basis for the 14,7 kg lightweight everyday classic from STEVENS.

#### 2. STRONG GUIDANCE

The super-light rigid fork, where both fork legs are made exclusively for STEVENS from one piece without any welds – well stiff enough for the front disc brake.

#### 3. PROVEN PARTNERS

Shimano's Alivio 3x9-speed drivetrain, reliable hydraulic disc brakes and puncture resistant Schwalbe tires.

#### 4. USEFUL ACCESSORIES

A functional complete set-up – from pannier rack system to hub dynamo-driven LED lights with daylight and stationary

---

## LIGHT AND VISION

---

Small cause with big effect: You can easily leave the Avy T headlight from market leader Busch+Müller (attached to a stable fork holder) switched on at all times. This is due to its smart "LIGHT24" technology that ensures intensity of the daylight function is automatically adapted to the surrounding light. Thanks to the smooth-running hub dynamo, you won't be slowed down even if it's towards the end of the ride. So go ahead and confidently ride home after a long day at the office, hanging out the café or a night at the opera.

---

## SAFETY AND PRECISION

---

This hydraulic disc brake provides its braking power with finely-tuned modulation under all weather conditions. Once you experience this for yourself, you'll never want to go back to cable-actuated rim brakes again. The Galant Lite's super-light fork is torsionally stiff while offering superb steering precision.

ELEGANCE LITE  
CORVARA

---

No matter if you ride your STEVENS City bike on your daily commute, running errands, to meet friends at a café – or all of them, the choice is yours. The bikes, with lightweight aluminium frames and lots of integrated components, are your reliable companions to deliver agile handling for everyday use in the city or for a smooth ride through the countryside. We spec them with low-maintenance gear hubs with 8 or 11 gears. In the models Super Flight, Courier Luxe and Boulevard Luxe, we combine these gear hubs with a maintenance-free belt drive. All you need to do is ride...

---

# CITY

## COURIER LITE

### FEATURES //

#### 1 CLASSY DESIGN

The connoisseur will appreciate the triple butted aluminium frame with load specific tube shapes from the first moment.

#### 2. STABLE STEERING

Our S-Lite Aluminium fork not only is super-light but also steers super-precisely.

#### 3. SAFE BRAKING

The hydraulic Shimano disc brakes provide powerful deceleration and perfect modulation in all weather conditions.

#### 4. FUNCTIONAL SPECS

Well equipped for every-day use and touring - from the sturdy pannier rack to the reliable LED lights with stationary and daytime-run function.

The noble Alfine crank with piano laqueur finish nicely matches your business attire. Thanks to its full-protection chain guard, there is no chain lube to fear! You can conquer city traffic with full confidence atop our business courier.

---

**LITE APPEARANCE**

---

Frame and fork made of lightweight aluminium tubes. Smartly equipped. Result: typical STEVENS. Instead of compromising in terms of functionality, durability and reliability, the riders of our new Courier Lite enjoy its agile handling – whether on their daily downtown commutes or weekend excursions beyond city limits.

---

# SUPER FLIGHT

- › Luxury tourer w/ triple butted aluminium frame, Gates CDX carbon drive and high-quality components

# JUNIOR TOUR

FURIOUS  
TOUR

TOUR NEXUS  
TOUR NEXUS GIRL

---

We take our children's bikes just as seriously as our "grown-up" bikes. Our Junior models have a geometry to fit ambitious youngsters. They provide low center of gravity and low weight for best possible handling. The Furious features off-road ruggedness while remaining street-legal. The Tour models feature everything that's required by law as well as all that is useful for the best riding experience. This includes lights, reflectors, fenders, and pannier racks. The frames are available in several sizes with 20, 24 and 27.5" wheels and in trendy colors. They all include the most ideal prerequisites to encourage youngsters to gladly hop on their bikes so they can build a lifetime habit of using bikes as transportation.

# RESEARCH & DEVELOPMENT

## FOR RELIABILITY AND EASE OF MIND

Curiosity is a basic quality. Always striving for an even better solution, a sophisticated adjustment, the bicycle of tomorrow. Always demanding a bicycle to be light, sporty, high-quality, durable and, last but not least, always absolutely worth its price. This is what inspires STEVENS to switch the light on every morning for the last 30 years.

### BEST EQUIPPED

A product is only as good as the conditions under which it was developed. That's why our development engineers are provided with everything they need: Latest state-of-the-art hardware and software, machines and test beds, material selection and lab equipment. Time for thorough test rides and the liberty to question proven technologies and solutions and to completely re-think production techniques.

### NEVER STOP!

For those with a background in competitive cycling, there can only be one motto: Keep going until the finish – preferably victorious. We check and evaluate in-house using latest state-of-the-art hardware and software that incorporates the most current bicycle design technologies. We do this until we can finally say: Perfect! That is...until we start again to review ideas and improve details. NEVER STOP are the words we live by. This keen eye for detail pays off – as proven by many awards from magazines and in dealer reviews.

### CYCLES OF INNOVATION

Multiplying know-how by sharing it. This is why STEVENS engineers keep permanent contact with outside experts and suppliers. This way they come up with solutions that might improve a bike only by a detail – but every detail surely makes a difference. In collaboration with Tubus, we developed a pannier rack directly supported by the frame and whose upper cross strut is hidden under the mudguard for a clean appearance and improved handling stability. Suspension forks with thru-axles on our pedelecs and disc brake wheels offer a plus in safety. This is a detail that we initiated with our supplier Suntour SR. We are also known for our creative yet practical in-house inventions. One of our many ground-breaking designs is the STEVENS PowerTube pedelec frame. Harmonious tube shapes incorporate battery and motor to express a clear design language. It features intricate details like an opening at the dropout for the indivisible drive belt and charging port. Another example of our unique inventions is our light yet stiff S-Lite aluminium fork. We also designed an adjustable rear dropout for our bikes with gear hubs to keep the rear wheel in a perfectly straight position.

# QUALITY ASSURANCE

## CONSISTENT AND THOROUGH

STEVENS bikes are known for two particular properties. They are very lightweight and extremely durable. There's no secret to this. It is simply achieved by our process to check, check and re-check what we develop. This is not only done in the test phase where the engineers fine tune their innovations, but most importantly during and after serial production. What the prototype promises, the production model must deliver on. By not differentiating between development and manufacturing, we ensure exact processes are maintained. Developers are personally integrated into the quality assurance of the serial production - check, check, re-check.

### EXTERNAL EXPERTISE

We are our own worst critics. That is why we don't just rely on ourselves. We constantly seek that critical eye from outside of STEVENS. Our partner for this is the Zedler-Institut für Fahrradtechnik und -sicherheit (Zedler Institute for bicycle technology and safety). Dipl.-Ing. Dirk Zedler is a highly respected, publicly commissioned bicycle expert. With his help, we know the exact qualities of our products: frames (both aluminium and carbon), forks, seat posts, wheels, etc...we have them extensively tested in the exact combination in which they are assembled. This extra effort helps to take STEVENS Bikes to that next level of light weight and durability.

### INTERNAL EXPERIENCE

STEVENS employees are true experts in their jobs. That's largely because most of them are passionate cyclists. They ride their bikes on their daily commutes, go for extended cycling trips on their holidays or for fast-paced group rides after work. With so many real-life in-house testers with varied riding preferences always on hand, STEVENS surely benefits from a constant stream of feedback. All thoughts and observations are delivered directly to the development engineers who can immediately go to work on improving the product(s).

# STEVENS PREMIUM SUPPLIERS

## OUTSTANDING QUALITY AND PERFORMANCE

STEVENS Bikes is known for quality, reliability and innovation. This is why we rely on first-class brand products when it comes to equipping our bikes. The manufacturers of these carefully chosen products have proven themselves to be market leaders in terms of quality, innovation, know-how as well as service. We have invested much time and effort into developing these relationships so that we can continue to deliver the best bikes possible. Many of our bikes' innovations, in fact, have come out of this close relationship with our suppliers.

# SHIMANO

## SHIMANO

Be it on a short Sunday ride or an extended journey over hundreds of kilometers, for occasional short errands or the daily commute, you'll only have fun riding your bike if you can fully trust in its material. For over 100 years, Shimano has made no compromises in the quality of their bicycle components. They are designed to be robust, reliable and durable, which SHIMANO products are famous for. In particular, their powerful brakes with expert modulation, smooth and precise shifting components and efficient drivetrains provide utmost safety and lots of fun when riding a bicycle.

## RACKTIME

"Click" – the reassuring sound when a Racktime product is securely snapped onto the rack, connected by the Snapit adapter. Brands of the Hebie group impress with their flexibility, reliability and highest-level quality. Racktime is no exception. The luggage racks stand for longevity and load-bearing capacity. It can easily be equipped to match your needs with use of its respective accessory products thanks to the system concept. Choose basket, bicycle bag or any of the other versatile transport solutions – the carrier load always reaches its destination safely. Racktime is truly indispensable for everyday cycling.

## SCHWALBE

### SCHWALBE - PROFESSIONAL BIKE TIRES

All of us at Schwalbe love the bike. What makes it fascinating is its ingenious simplicity, astonishing versatility, and use of cutting-edge technology and creative designs. To this end we play our part with unlimited enthusiasm - as the world's leading bicycle tire specialist. Our family-run, third-generation company is driven by innovation, such as the new high performance ADDIX® compound, or tubeless technology for road bikes.

## SKS

As a leading manufacturer of bicycle accessories, SKS GERMANY has been ensuring that the wheels roll for almost 100 years. The quality seal Made in Germany reflects their high demands on quality and function. Air pump range includes high-quality mini- and frame pumps, precise suspension- and floor pumps as well as the Rennkompressor (race compressor). SKS GERMANY is also known worldwide for its innovative mudguards for every wheel and frame size. They ensure optimum protection against dirt and splashed water. In addition to multitools, chain guards, bottles, bottle cages, bicycle bags as well as a bike care series, a smartphone holder with wireless charging station has also been integrated into the program.

# busch+müller

## BUSCH+MÜLLER

Light and sight for bicycles: Since being founded 1925, many developments by Busch + Müller have become standard: Standlight, daytime running LEDs, special e-bike lights – and IQ light technology, which raised bicycle light brightness overnight by 300% to 40 Lux. Today, the 100 Lux barrier has been broken. The newest high-end products are IQ-XM, a high beam light for e-bikes, as well as μ, the world's smallest rear light approved for road use, both of them design products in aluminium casing. Meinerzhagen has always been the only production site. Idea, technology, design, manufacturing – all products by Busch + Müller are "made in Germany".

## GATES

"Gates Carbon Drive™ is an award-winning drivetrain engineered to meet the high demands of modern cyclists. It replaces greasy and dirty chains with a clean, quiet and strong carbon fiber belt that never rusts and never stretches. Created by Gates Industrial Corporation, a global leader in belt technologies for automobiles and industry, Gates Carbon Drive™ is race proven on the World Cup Downhill circuit and UCI approved for elite BMX racing. It has powered adventurers through the planet's most extreme conditions, from the Sahara Desert to Arctic snowfields and high mountain passes. When shopping for a bike, look for the Gates logo and patented CenterTrack design.

# BIKEWEAR & ACCESSORIES

---

CASUAL WEAR

BAGS & PARTS

---

STEVENS Bikewear is also suitable for everyday and leisure cycling. We also have casual wear so you look stylish off the bike as well. From softshell jackets suitable for everyday use to subtle t-shirts made of 100% organic cotton and New Era's baseball caps. You can also shop in our Bags & Parts collection. You'll find everything you need for touring or cruising with your bike like STEVENS panniers, bike bottles and mini tools.

# CASUAL WEAR

## 1 STEVENS T-SHIRT

Fabric: 100 % organic cotton  
Extras: basic cut, crew neck  
Colors: black, grey, white  
Sizes: XS, S, M, L, XL, XXL

## 2 SNAPBACK CAP BY NEW ERA

Fabric: 100 % cotton  
Extras: adjustable size  
Color: black  
Sizes: S/M, M/L

## 3 SNAPBACK PODIUM BY NEW ERA

Fabric: 100 % cotton  
Extras: adjustable size  
Color: black  
Size: S/M

## 4 KNIT BEANIE BY NEW ERA

Fabric: 100 % PA synthetic elastic fiber  
Color: black  
Size: unisize

6

7

8

**5 SCARF CAP**

**Fabric:** 100 % PES breathable fiber  
**Extras:** Perfect fit due to elastic knitwear and cord stopper  
**Color:** black  
**Size:** unisize

**6 STEVENS HOODIE**

**Fabric:** 100 % organic cotton  
**Extras:** full-length front zipper, 2 pockets  
**Color:** black  
**Sizes:** XS, S, M, L, XL, XXL

**7 SOFTSHELL VEST**

**Fabric:** 100 % polyester, TPU membrane, fleece lining, breathable, water- and wind-repellent  
**Extras:** full-length underlayed front zipper, chin protection, 3 zippered pockets  
**Color:** black  
**Sizes:** XS, S, M, L, XL, XXL

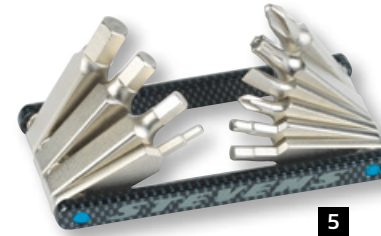

**8 SOFTSHELL JACKET**

**Fabric:** 100 % polyester, TPU membrane, fleece lining, breathable, water and wind-repellent  
**Extras:** full-length underlayed front zipper, chin protection, 3 zippered pockets  
**Color:** black  
**Sizes:** XS, S, M, L, XL, XXL

# BAGS & PARTS

2

5

7

## 1 ASS SAVER

**Fabric:** 100 % recyclable polypropylene  
**Weight:** 18 g  
**Color:** black-white  
**Measurment.:** 370 x 110 mm

## 3 COFFEE MUG

**Fabric:** porcelain  
**Color:** black-white

## 5 MULTITOOL CARBON-10

**Fabric:** carbon, ultra flat  
**10 tools:** socket screws 2, 2.5, 3, 4, 5, 6, screwdriver -x/X, torx 25  
**Finish:** carbon glossy

## 2 BOTTLES

**Fabric:** plastic  
**Extras:** screw cap, wide filler opening  
**Volume:** 500 ml, 750 ml  
**Colors:** transparent-black, transparent-blue, transparent-WC stripes, transparent-red-black

## 4 UMBRELLA

**Fabric:** 100 % polyester  
**Extras:** storm protection, reflective print  
**Color:** black  
**Diameter:** approx. 130 cm

## 6 SADDLE BAGS

**Fabric:** 100 % polyamide  
**Extras:** velcro strips for mounting to the saddle, tube and tire lever included  
**Color:** black  
**Sizes:** cross tube 700 x 28-37", road bike tube 700x18-25"

## 7 SHOW BAG

**Fabric:** 100 % polyester  
**Extras:** 1 zippered inner compartment  
**Color:** black-white

# DEALER & SERVICE

## SERVICE AND ADVICE

STEVENS bikes are only available at certified dealers whose expertise you can trust 100% - just as we do. Your STEVENS dealer will advise you on which bikes best meet your wishes, needs and requirements. What you can also expect from your dealer is a perfectly assembled, maintained bike that will be specifically adjusted to fit you like a glove and match your unique preferences. For you, this translates into unadulterated fun and function from the very first pedal stroke. Support your local business and buy your new bike where you get extensive and personal advice. Even after your purchase, your dealer will provide all the service your bike will need. You can also turn to your local dealer for tips and advice about everything from the bike's function and handling to suggestions on further customizing it to your needs.

---

### TEST RIDE

---

Take the time for a proper test ride, since this bike will be your reliable companion for years to come. Ride the kind of roads you will use your future bike on the most. Try different models and different sizes. This is the best way to get a clear overview on how the bike performs.

---

### MAINTENANCE

---

Regular maintenance performed by a dealer will make sure your bike will ride and function as expected for many years. Wear and tear parts like chain, brake pads and tires should be replaced on a regular basis. Gear hubs and suspension forks often have specified maintenance schedules.

---

### BICYCLE LEASING

---

STEVENS bikes and e-bikes can also be leased, similar to how companies offer company cars to their employees. This leasing program also applies to sports bikes. After your employer has given their approval, you simply chose your favorite STEVENS bike, pay a monthly rate during the leasing period and also profit from a lower price due to tax benefits.

---

### FINE TUNING

---

If you have special preferences in terms of saddle, grips or pedals, your dealer can change these parts for you. A longer or shorter stem can further change your seating position. Also, consult your dealer about any possible changes in specs and accessories before you purchase your bike. You will surely benefit from this next-level service on each and every ride.

---

### WARRANTY

---

In case there is a defect in the material, the original owner of the bike has a five-year STEVENS warranty starting from the date of purchase. This extensive insurance against faulty material or workmanship applies to frame and components that bear our name – regardless of frame material.
